Chance has reproduced himself well; bringing to the litters his moderate conformation; good fronts, deep chests, excellent movement, and wonderful temperament. All have shown potential for the field and willingness to please. Many have exhibited his natural field talent and intelligence. His puppies are busy ones and very intelligent. They will definitely need a job.

Most will start with a lighter coat color, but will darken to a golden rust or darker according to its dam. Some eyes have taken a bit longer to darken, but will and are a nice dark amber to brown. Extremely small roan spot only on a couple of pups. Only one had more – but not disqualifying.
